### Education

Bachelor of Commerce, Economics, Victoria University of Wellington. **2013**

### Work experience

**Earthquake Commission New Zealand, EQC: Fraud and Data Analyst** **2017**

As part of the data analytics team in EQC I was responsible for day-to-day production of statistical data analysis, forecasting, modelling, and specialist research especially in the field of fraud detection, intelligence processes and products. I used R, SQL, visual studio and excel/vba extensively to provide key insights for complex and highly sensitive data. I worked closely with Fraud, Finance and Audit to provide continued assurance over the ongoing claims from private insurers.

I was able to thrive as a team member in an environment that is undergoing constant change on a daily basis. I worked effectively both alone and in a team environment and was able to manage my own workload, prioritise and contribute towards team goals. The role demanded problem solving and I built a number of programmes to assist internal business units using application of qualitative and quantitative research techniques.

**Crank Finance Limited: Moola, Business Analyst** **2015 – 2016**

My role was to deliver insight and help develop processes in a fast growing FINTECH startup. This analytical role included determining risk assessments of customers for credit and restructuring of existing lines of credit. The position included reporting, SQL database analysis and financial forecasting for both the COO and CEO.

**Stealth Hospitality Limited: The Dirty Land, General Manager** **2013 - 2015**

My role was customer service and sales driven with management of staff, product, and reputation. Within the ever changing Christchurch landscape The Dirty Land has focused on producing a high quality product with exceptional service which has allowed it to establish itself as a leader in Christchurch hospitality.

My marketing strategy successful negotiations and coordination with the stakeholders hold testament to the success of the business. Further my background in finance and statistics allowed for greater understanding in driving the bottom line of the bar.

**Victoria University Wellington Research Scholarship** **2012 – 2013**

The research was a cost benefit analysis entitled "The socioeconomic effects stroke rehabilitation therapies have on recovery and quality of life." The research was a joint venture between Imable Limited and Victoria University of Wellington under supervision of the head of Victoria's Economics and Finance school, Professor Morris Altman. The research paper is available by request.

## **Software experience**

Extensive use of R and it's various packages for data analysis, Geospatial analysis, production and visualization.

SQL including MYSQL PSQL and knowledge of database schemas.

Excel to an expert level including knowledge of VBA.

Python to an intermediate level.

HTML CSS JS to an intermediate level.
